

## ***CURRICULUM VITAE***

### ***PERSONAL INFORMATION***

Name	Mariaconcetta Sicurella
Address	Via Pavone, 16 44121, Ferrara
Telephone	320-2584644
E-mail	<a href="mailto:scrmcn@unife.it">scrmcn@unife.it</a> ; <a href="mailto:sicurella83@libero.it">sicurella83@libero.it</a>
Nationality	Italian

### ***WORK EXPERIENCE***

Year	January 2013 – Present
Name of employer	University of Ferrara
Type of business or sector	Virology and Microbiology
Occupation or position held	Research Fellow
Main activities and responsibilities	Responsible for the development of vectors based on herpes simplex virus type 1 as a model vaccine against human pathogens: TB, HSV, HIV.
Year	January 2012 – November 2012
Name of employer	University of Ferrara
Type of business or sector	Research and Marketing
Occupation or position held	Research Assistant
Main activities and responsibilities	Market research: detect, discover, allocate and interpret data  Collaborate identification of marketing strategies to promote the visibility of the products  Manage correspondence of marketing to potential customers and suppliers
Year	January 2009 – December 2011
Name of employer	University of Padova
Type of business or sector	Biomedicine (Virology, Microbiology)
Occupation or position held	PhD Student
Main activities and responsibilities	Responsible for the study on the role of the tat protein of HIV virus in the generation of new herpes Simplex vectors for the development of vaccines
Year	September 2007 – December 2008

Name of employer	University of Ferrara
Type of business or sector	Biochemistry and Molecular Biology
Main activities and responsibilities	Studies on diseases of the blood Tutor for Laboratory of Biochemistry

***EDUCATION AND TRAINING***

Year of Award	December 2008
Qualification	Practice the profession of biologist
Institution of Education	University of Ferrara
Year of Award	April 2012
Qualification	PhD
Institution of Education	University of Padova
Dissertation Title	Evaluation of the immunogenicity and efficacy of herpes vectors for the development of a vaccine against HSV infection
Evaluation	Excellent
Year of Award	October 2007
Qualification	Master's Degree
Institution of Education	University of Ferrara
Dissertation Title	Nuovi modulatori allosterici per il recettore A1 dell'adenosina:uno studio farmacologico e funzionale
Evaluation	110 cum laude
Year of Award	October 2005
Qualification	Bachelor's Degree
Institution of Education	University of Ferrara
Dissertation Title	Nuovi ligandi antagonisti per il recettore A2B dell'adenosina
Evaluation	104/110
Year of Award	2001
Institution of Education	Liceo socio-psico-pedagogico "F.Crispi" Ribera
Evaluation	100/100

## ***LANGUAGES***

MOTHER TONGUE

**ITALIAN**

OTHER LANGUAGES

**ENGLISH**

Reading skills

B2

Writing skills

**FRENCH**

Reading skills

Good

Writing skills

Elementary

Verbal skills

Good

## ***IT SKILLS***

Microsoft Office (such as: Word, Excel, Power Point, Outlook, Photoshop) Apple programs,

Internet, Graphpad for Microsoft and for Apple pc.

## **COMPETENCES**

Medium for bacteria and cells

Culture of bacteria and cells in liquid and solid medium

Determination of bacteria (through quantitative and spectrophotometric methods).

### **Microscopy:**

Confocal and Fluorescence

### **Recombinant technologies:**

Extraction, purification and precipitation of plasmid DNA from bacterial

Cloning Techniques

Preparation of a competent bacteria and transformation analysis

Agarose gel electrophoresis

Transfer of DNA in the filter (Southern Blotting) Preparation of probes DNA

### **Analysis of protein:**

Transfection of cells with CaCl<sub>2</sub> and Lipofectamine

Cell lysis

Determination of proteins concentration (Bradford method or BCA) Electrophoresis of proteins on polyacrylamide gels with Sodiodecilsfosfato (SDS-PAGE)

Transfer of proteins in the filter (Western-blotting)

Hybridization with mono-and polyclonal antibodies

Revelation Chemoluminescenza  
Construction of fusion proteins (GST)

**Viral expression systems:**

Construction of the Herpes vectors and their application *in vitro* and *in vivo*,  
Amplification and titration recombinant viruses  
Infection of human and murine cells

**Immunological assays:**

Elispot and ELISA assay  
Blood's purification elements

**Model *in Vivo*:**

BALB/C and C57BL/6  
Immunization (Intradermic, subcutaneous, intravaginally)  
Eye bleedig and Necropsy  
Mucosal samples

**Pharmacological Test:**

Saturation and competition Binding Assay  
Determination of levels of cyclic AMP

**Laboratory equipment:** use and / or maintenance of the equipment necessary for the implementation of the above listed laboratory techniques.

**PUBLICATIONS**

**An attenuated Herpes simplex virus type 1 (HSV1) encoding the HIV-1 Tat protein protects mice from a deadly mucosal HSV1 challenge.**
